REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a fuel cell providing output power to a load within an operating range, except during predetermined intervals in time during which the output power to the load is reduced to a level that is below the minimum operation output level. The closest prior art of Wilkinson et al is deficient in this teaching as Wilkinson et al only discloses a fuel starvation not minimization of operation output level. Applicant's instant invention does not "starve" the cell of fuel but instead, minimizes operation output level. Therefore the instant invention as set forth is novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
